

GRZEGORZ MARTOWSKI

SENIOR FRONTEND DEVELOPER | TECH LEAD

Senior Frontend Developer with over 14 years of experience in IT, including more than 8 years working within the React/TypeScript ecosystem. I specialize in building frontend applications, e-commerce platforms, payment solutions, and enterprise-grade applications.

I have experience working across startups, product companies, corporations, and software houses. My expertise is primarily focused on building e-commerce applications using the React/Next.js and TypeScript ecosystem, complemented by experience in payments, A/B testing, analytics, and frontend architecture.

I also currently take on a Tech Lead role, supporting frontend technical direction and collaboration with CRO and SEO teams. In my day-to-day work, I use Claude Code and AI-powered development tools for software development, problem-solving, and task automation.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer / Tech Lead

01.2019 – Present

Xebia / PGS Software

Worked on multiple international projects, primarily focused on building e-commerce and web applications using React/Next.js, covering areas such as payments, healthcare, compliance, and internal business platforms. Currently working as a Tech Lead, supporting frontend technical direction and collaborating with Growth, CRO, and SEO teams.

- Providing frontend technical direction and supporting CRO/SEO teams with experimentation and analytics.
- Working with Optimizely, Hotjar, Google Tag Manager, and Datadog for experimentation, analytics, and application monitoring.
- Leading the migration of redirects from Akamai to Contentful, including developing a migration script using AI agents. Actively using Claude Code in day-to-day development.
- Developing Next.js-based e-commerce platforms, including A/B testing, dynamic search, and secure payment integrations.
- Developing and maintaining a TypeScript payment library supporting 3D Secure, Apple Pay, and Visa Checkout, used in PCI-compliant payment processes.
- Developing applications using Webpack Module Federation architecture and migrating functionality from monolithic systems to independently deployable microfrontends.
- Working across the full software development lifecycle, including feature implementation, performance optimization, automated testing, security vulnerability remediation, and technical planning.
- Collaborating through pair programming and working closely with development, product, design, CRO, and SEO teams.

Technologies: React, Next.js, TypeScript, JavaScript, Tailwind CSS, MUI, shadcn/ui, React Query, SWR, Webpack Module Federation, Storybook, Optimizely, Hotjar, Akamai, Contentful, Datadog, Google Tag Manager, Auth0, Jest, Vitest, React Testing Library, Cypress, Turborepo, pnpm, Azure Pipelines, Claude Code.

Frontend Developer

Avra sp. z o.o.

10.2014 – 12.2018

- Transitioned from full-stack development with PHP/Symfony to frontend specialization, working with jQuery, AngularJS, and React.
- Developed and maintained a web platform for one of the largest employee benefits providers in Poland.
- Contributed to the migration from a monolithic architecture towards a component-based architecture.
- Worked directly with the client as well as technical and business teams.

I hereby consent to the processing of my personal data contained in this CV for the purposes of the recruitment process, in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council (GDPR).
