PROFESSIONAL SUMMARY

Senior Frontend Developer with over 14 years of experience, working at Xebia since 2019. I have 9 years of experience with React.js, 7 with TypeScript and nearly 3 with Next.js. I specialize in e-commerce platforms (retail, travel) and SEO/CRO, and have experience in payments (PCI, 3D Secure). I own production code: I diagnose issues quickly, ship changes safely, deliver new features, run A/B tests and optimize Core Web Vitals.

I work with Claude Code day to day (code review, migrations, coding). I hold the Google Cloud Generative AI Leader certification. I am looking for a product team I can commit to for the long term: I take ownership of code quality, work daily with the Product Owner and the SEO/CRO team, and support less experienced colleagues through code review and onboarding.

SELECTED ACHIEVEMENTS

- **Payments library (PCI):** a framework-agnostic card payment implementation in TypeScript (3D Secure, Apple Pay), built in a two-person team.
- **Migration of 4,000+ redirects (Akamai → Contentful):** CMS users now add redirects themselves, without involving support, SEO/CRO or DevOps.
- **Dependency security (Dependabot):** resolved security alerts across ~50 client repositories, including shared frontend libraries.
- **Internal React.js guild:** lead and moderator for over a year (15–30+ attendees from various projects).

PROFESSIONAL EXPERIENCE

Xebia (formerly PGS Software) | 01/2019 – present

Career progression: Frontend Developer (01/2019) → Senior Frontend Developer (10/2022). Client-services model, usually in teams of 4–5: rotated across client projects in e-commerce (retail, travel), payments, healthcare and compliance, quickly getting up to speed in new domains.

Senior Frontend Developer | Xebia – project: e-commerce (retail), Next.js | 03/2026 – present

- Own the codebase and technical decisions for SEO and CRO features; collaborate with the client and SEO/CRO specialists.
- Plan sprints together with the client's Product Owner; introduce coding standards in the team and document them in Confluence.
- Migrated over 4,000 redirects from Akamai to Contentful (migration script written in Node.js with Claude Code), removing unused and duplicate entries.
- Implement monitoring (Datadog), A/B tests and feature flags (Optimizely) and user behavior tracking (Hotjar); run Core Web Vitals audits in Lighthouse.
- Conduct code reviews, including for people outside the team; for very large or AI-generated pull requests use Claude Code for support.
- Support new team members in onboarding (most recently onboarded a new developer).

Technologies: Next.js (App Router, SSR/SSG), React Server Components, React, TypeScript, Node.js, Contentful, Akamai, Optimizely, Hotjar, Datadog, Lighthouse, Confluence, Claude Code

Senior Frontend Developer | Xebia – project: e-commerce (travel), Next.js | 08/2025 – 03/2026

- Maintained and extended the frontend of a holiday booking platform (integrated with an external search engine): dynamic filters (e.g. date, price, departure point) and secure payment integration.
- Implemented A/B test variants in Optimizely, defined by the Product Owner; optimized frontend performance.
- Pair-programmed full time with another Senior Frontend Developer on a system for a large European tour operator: every feature was known to two people.

Technologies: Next.js (App Router, SSR/SSG), React, TypeScript, Optimizely, Core Web Vitals

Senior Frontend Developer | Xebia – project: healthcare app (weight loss), Next.js | 04/2024 – 08/2025

- Built new features and extended and maintained a Next.js application for the UK market, including checkout up to the payment step.
- Resolved security alerts from GitHub Dependabot reports across ~50 client repositories, including shared frontend libraries, through dependency upgrades, overrides and npm audit.

Technologies: Next.js (App Router, SSR/SSG), React, TypeScript

Senior Frontend Developer | Xebia – project: compliance platform, microfrontends | 10/2022 – 04/2024

- Built features in a microfrontend architecture (Webpack Module Federation) and migrated features from a legacy monolith to independently deployed microfrontends.
- Extended the shared component library (design system) in Storybook and took part in architecture planning sessions.

Technologies: React, TypeScript, Webpack Module Federation, Storybook

Frontend Developer | Xebia – project: gift card back office | 01/2022 – 10/2022

- Built a React application for operations and finance teams: filtering, sorting and financial reports.

Technologies: React, TypeScript, Ant Design (antd), Jest, Webpack, i18next, JWT

Frontend Developer | Xebia – project: payments library (PCI) | 01/2019 – 01/2022

- In a two-person team, built a framework-agnostic TypeScript library for card payments with 3D Secure and Apple Pay, with secure cross-domain data storage (Publish-Subscribe, postMessage, iframe).

Technologies: TypeScript, 3D Secure, Apple Pay, postMessage, iframe

Internal initiatives

- React.js guild (lead and moderator). Talks: “React Compiler – the end of useMemo, useCallback and memo?”, “PostHog – a tool for everything, but is it really?”, “shadcn/ui – useCopyAndPaste()”.

Avra sp. z o.o. | 10/2014 – 12/2018

Frontend Developer | Avra – project: employee benefits platform

- Developed and maintained the platform of one of the largest employee benefits providers in Poland.
- Worked on migrating the frontend from jQuery to React.js and implementing new designs within a new microservice architecture (migration from a monolith).

Technologies: React, JavaScript, AngularJS, jQuery, HTML5, CSS3, PHP/Symfony, Git

EARLIER EXPERIENCE

- Pixelite – Freelance Web Developer (06/2014 – 12/2018, concurrent)
- The Green Line – Junior Web Developer (05/2014 – 10/2014); Funmedia – Junior Web Developer (10/2013 – 04/2014); Credit Suisse CoE Wrocław – Junior Web Developer / Publisher (07/2012 – 04/2013)

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, responsive design

Rendering, performance and accessibility: Server-Side Rendering (SSR), Static Site Generation (SSG), Incremental Static Regeneration (ISR), Client-Side Rendering (CSR), Core Web Vitals (Lighthouse), performance optimization, accessibility (WCAG)

State, data, forms and routing: TanStack Query (React Query), Redux, Redux Toolkit (RTK), SWR, React Router, React Hook Form, REST API, Axios, Fetch API

UI and styling: Tailwind CSS, shadcn/ui, MUI, Ant Design (antd), styled-components, CSS Modules, Sass/LESS, design system (Storybook, Atomic Design), Figma

Testing: unit testing, E2E testing, Vitest, Jest, React Testing Library, Cypress, Playwright, MSW

Architecture and build: micro-frontends (Webpack Module Federation), monorepo (Turborepo, pnpm workspaces), Webpack, Vite, npm, Yarn, Node.js (scripting)

CI/CD, cloud and version control: CI/CD, Azure DevOps, Git, GitHub, GitLab, SonarQube, Dependabot, Vercel

E-commerce, SEO, CRO and analytics: SEO, CRO, Optimizely (A/B tests, feature flags), PostHog, Hotjar, Datadog, Akamai; CMS: Contentful, Sanity

Payments and security: PCI, 3D Secure, Apple Pay, JWT

AI: Claude Code, AI-assisted development, AI agents, prompt engineering

Methodologies and practices: code review, mentoring, Agile, Scrum, pair programming, A/B testing

Tools: WebStorm, Jira, Confluence

EDUCATION

- Wrocław University of Science and Technology, Faculty of Information and Communication Technology (formerly Faculty of Electronics): MEng in Teleinformatics (2007 – 2012, in parallel with a second degree)
- Wrocław University of Science and Technology, Faculty of Management (formerly Faculty of Computer Science and Management): Bachelor’s degree, Management (2010 – 2013, in parallel)

CERTIFICATIONS

- Google Cloud Generative AI Leader, Google Cloud (06/2026)
- Professional Scrum Master I (PSM I), Scrum.org (10/2016)

PERSONAL PROJECTS

- Bella Mąka (bellamaka.pl, 2026): bilingual (PL/EN) website for a local pizzeria, built with Claude Code. Next.js (SSR/ISR), TypeScript, Tailwind CSS, shadcn/ui, Sanity, Storybook, Vitest, Playwright, Vercel. Code: github.com/grzeg/bella-maka

LANGUAGES

- Polish: native | English: C1 | German: B1

AVAILABILITY AND PREFERENCES

Remote or hybrid (Wrocław) | B2B contract or employment contract | Available from January 2027 (negotiable)
